NPIC/P&DS/D/6-716
11 January 1966

MEMORANDUM FOR: Chief, Technical Intelligence Division

ATTENTION: Chief, TAB/TID

SUBJECT: Additional Programming and Logic Circuitry for the AP-3
Analytical Plotting System

REFERENCE: 1 - Contract []

1. In accordance with your request, [] personnel have been invited to NPIC on January 25, 1966 to obtain the unclassified information required to enable them to submit a proposal to incorporate a strip photography capability in the AP-3 system.

2. [] tentatively plans to send three people; one engineer and two programmers. The two programmers do not hold Agency clearance but since the mathematical model is unclassified this should not pose a problem. The project engineer, [] holds an Agency Secret clearance.

3. If appropriate arrangements can be made, it appears that it would be most advantageous to set up this meeting in the TID conference room. If at all possible, the consultants that prepared the mathematical model should be present, as well TID and IPD personnel as the situation requires.

4. Due to the urgent nature of this matter, an early reply is requested.

Declass Review by NGA.

[]
Colonel, USAF
Assistant for Plans and Development
